ANTONIS ROUSSOS

Web Developer (React • TypeScript •HTML/CSS • Tailwind/SCSS)
Athens, Greece — Open to Remote
Email • LinkedIn • GitHub • Portfolio

SUMMARY

Web Developer with production experience in React & TypeScript, focused on high-quality, accessible and performant web applications. Experienced in building responsive interfaces, collaborating with designers, and delivering maintainable code through Git workflows. Strong interest in open-source, web standards, and continuous learning within distributed teams.

CORE SKILLS

- **HTML5/ CSS3/ SCSS**
- **TypeScript & JavaScript**
- **React (SPA), Component Architecture**
- **Responsive Design & Cross-browser**
- **Component libraries** (React Bootstrap, FlyonUI, MUI)
- **Accessibility (WCAG basics, ARIA, semantic HTML)**
- **Web Performance** (Lighthouse, bundle awareness)
- **Git / GitHub workflows**
- **Comfortable working in async, remote-first environments.**
- **SEO basics** (metadata, semantic structure)

PROFESSIONAL EXPERIENCE

Front-End Developer — eLearning Industry | 2025

- Developed and maintained production UI in React & Tailwind, improving consistency and reducing UI regressions, through components reuse and structured styling.
- Built responsive UIs across devices/browsers, ensuring design system consistency with UX team.
- Improved accessibility & SEO foundations using semantic HTML and structured components.
- Collaborated with team members to align implementation with product requirements.
- Used GitHub PR workflow + reviews to ship changes safely.

SELECTED PROJECTS

Antonis-portfolio (React + TypeScript) - GitHub

- Built a **TypeScript-based React SPA** with modular components, ensuring maintainability and scalability aligned with modern web application standards.
- Implemented **responsive UI across devices and browsers**, following semantic HTML practices and accessibility considerations (ARIA labels, proper heading structure).Implemented reusable components and responsive layouts across the application.
- Optimized **web performance and Lighthouse** metrics through code splitting, image optimization, and efficient component rendering.

- Used **Git workflow with structured commits and PR mindset**, mirroring collaborative development with designers and UX-driven iterations.
- Implemented reusable components and **separation of concerns similar to component-library philosophy.**

React-portfolio / Personal Website - GitHub | Live

- Developed a **high-fidelity portfolio website in React**, focusing on UI consistency, component reusability, and clean CSS architecture and maintainable CSS architecture.
- Applied **SEO fundamentals and accessibility best practices** to ensure discoverability, semantic structure, and inclusive user experience.

EDUCATION

BSc (Hons) Computer Games Development — University of Derby
